# PARAGRAPH TYPES

## Paragraphs types ☆

[Home](#) » [Administration](#) » [Structure](#)

+ Add paragraph type

ICON	LABEL	MACHINE NAME	DESCRIPTION	OPERATIONS
	From library	from_library		Manage fields ▾
	HS2 Components: Banner	banner_component	A Hero Banner component that can display a single banner or a series of banners via Slick Carousel.	Manage fields ▾
	HS2 Components: Quote	quote_component	A quote component which displays quote and attribution text with an option background image / color. Also includes style options such as text positioning.	Manage fields ▾
	HS2 Sub-Component: Banner Rows	banner_component_rows	A sub-paragraph entity belonging to the Banner Component. This paragraph handles the slides output. Not meant for use outside of the Banner Component paragraph.	Manage fields ▾
	HS2 Sub-Component: Quote Rows	quote_component_rows	A sub-paragraph entity belonging to the Quote Component. This paragraph handles the row output. Not meant for use outside of the Quote Component paragraph.	Manage fields ▾

# CREATE A BLOCK

**BANNER SLIDE**

HS2 Sub-Component... Collapse

Fields Styles Mobile

▶ IMAGE

**Headline**  
It's like déjà vu all over again.

Enter a slide headline (optional)  
See Mobile Headline field to add an alternate mobile headline.

**Sub Headline**  
Yogi Berra

Input a sub headline (optional).

**CTA**  
**URL**

Start typing the title of a piece of content to select it. You can also enter an internal path such as `/node/add` or an external URL such as `http://example.com`.  
Enter `<front>` to link to the front page.  
**Link text**

▶ ATTRIBUTES

Use this field to create a call to action button with either internal or external links and call to action text. (Optional Field)  
See Styles section below for button size and color.

# CREATE A BLOCK

BANNER SLIDE

HS2 Sub-Component...

Collapse

Fields

Styles

Mobile

IMAGE

Select an image to render as the slide background (optional).  
See Mobile image field to select an alternate image for mobile devices.

Show row weights

PREVIEW	FILENAME	METADATA	OPERATIONS
<div><div></div></div>	yogi-pic1-right-1920x630.jpg	<div>Alternative text *</div> <div><div>Yogi Berra</div></div> <div>This text will be used by screen readers, search engines, or when the image cannot be loaded.</div>	<div>Remove</div>

Headline

It's like déjà vu all over again.

# STYLE YOUR TEXT

HS2 Sub-Component...

Collapse

Fields

Styles

Mobile

Additional Classes

Enter any custom CSS classes that should be added to the banner slide. All classes added here will be applied in addition to the styling options selected above. Separate each class with a space.  
Example: custom-class-one custom-class-two

TEXT STYLES

Text Container Width \*

100% (default)

Adjust the width of the text container (headline, sub headline, cta) over the slide.  
Not Applicable on Tablet or Mobile.

Text Position \*

Top Left (default)

Select slide region text should render. On mobile: top, bottom, and middle quadrants are unavailable.  
See Mobile Text Alignment to select an alternate alignment on mobile.

Text Color \*

Dark Color (default)

Select slide text color.

Headline Text Size \*

Large (default)

Text Size only affects Headline field.

# IMAGE STYLES

---

## IMAGE STYLES

### Image Size \*

Small Banner: 1920x430 ▼

Select an image style to apply to background image.

This image style will only apply to primary image. It will not have any affect on the mobile image if used.

### Background Color \*

Transparent (default) ▼

Select a background color to use when no background image has been selected and/or for drop text region.

### Custom Background Color

#000000

Use this field to override the Background Color field by adding a custom hexadecimal color code. Field must have a preceding hastag.

Hexadecimal Format example: #cf102d

Using the custom background field will override any selection made on the background color field.

# MOBILE STYLES

Fields

Styles

Mobile

Mobile Image Selector \*

Render Desktop Only Image (default) ▼

**Use Desktop Image Only** Use desktop image (and sizing) for both desktop and mobile (default option)

**Save Desktop Image for Mobile** Re-save desktop image at 640 wide with height scaled down according to image load times.

**Select New Image For Mobile** Add new image for mobile. Image will scale down to 640 wide and height scaled down to promote faster mobile image load times.

► MOBILE IMAGE

Mobile Headline

Add an alternate, shorter Headline for mobile devices. When blank, this defaults to desktop headline.

☐ Do Not Drop Text On Tablet

Check this option to force text to remain an overlay on Tablet devices.

☐ Do Not Drop Text On Mobile

Check this option to force text to remain an overlay on Mobile devices.

Drop Text Alignment \*

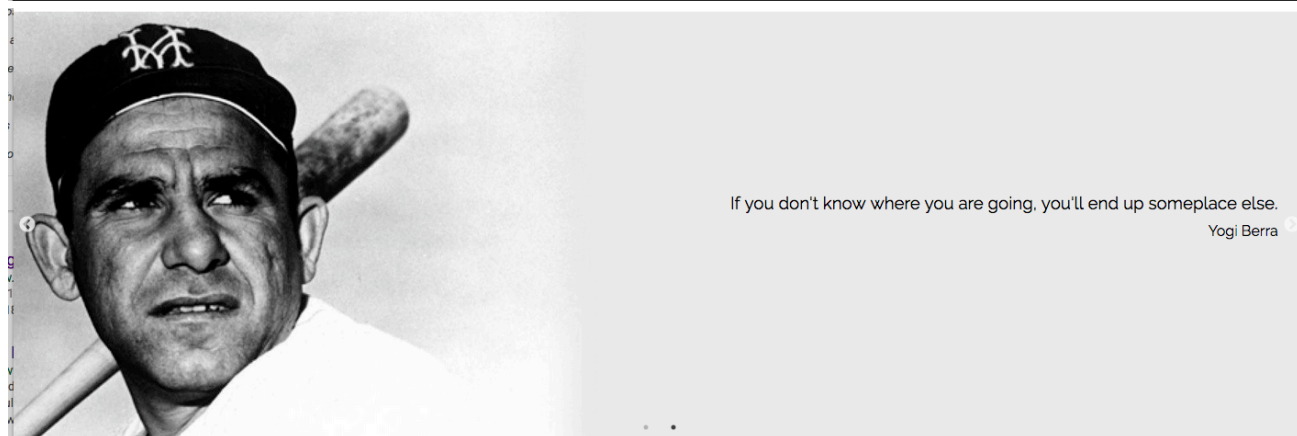

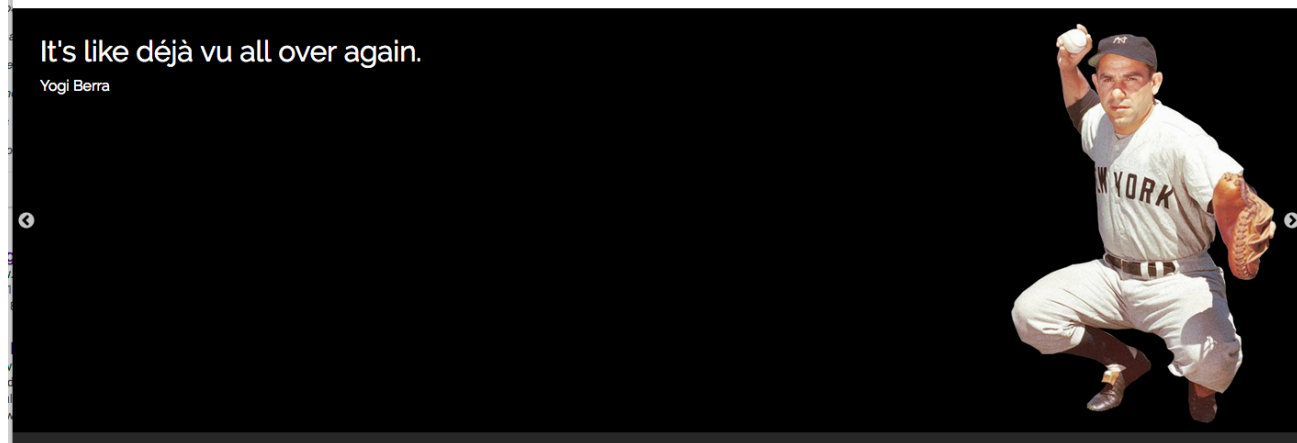

Left ▼

Select a text alignment option for when Drop Text (on Tablet and/or Mobile) is active.

# CAROUSEL OPTIONS

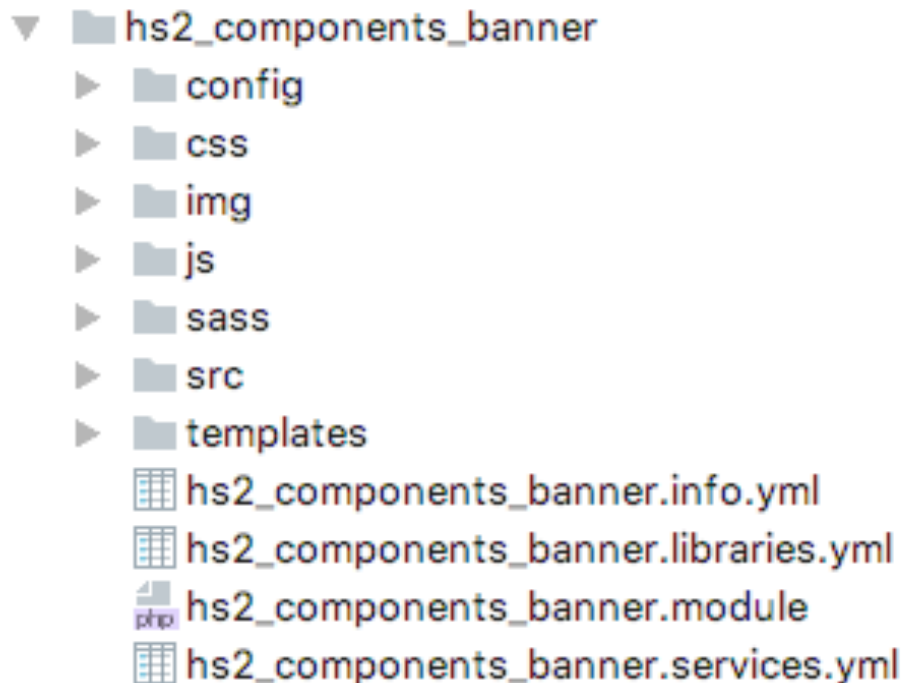

Banner Slides	<input checked="" type="checkbox"/> Enable Carousel Mode Check box to turn block into carousel. Requires a minimum of 2 items. Carousel Mode is enabled by default, however, if minimum items (2) requirement is not met, block will not render as a carousel even if toggled on.
Carousel Options	<div><b>CAROUSEL OPTIONS</b> <input checked="" type="checkbox"/> Show Slide Navigation Use checkbox to toggle Slide show navigation (dots). Default value is to show dots.  <input checked="" type="checkbox"/> Loop Slides Toggle checkbox to turn on or off infinite slide show looping. Slides loop by default.  <input type="checkbox"/> Enable Autoplay Toggle checkbox to enable / disable autoplay feature. Disabled by default.  <input type="checkbox"/> Use Fade Transition Toggle checkbox to switch between traditional right to left slide transition (default) or fade transition.  <b>Set Starting Slide</b> <input type="text" value="1"/> Input the slide number that the slide show should start with. Default is first slide.</div>

## EXAMPLES

## MODULE LAYOUT

---

## BANNER INFO FILE

---

```
